

Ankam Ajay

Software Developer — Node.js — React — MongoDB — REST APIs

📞 9989716659 ✉ ajay.ankam59@gmail.com 🔗 linkedin.com/in/ankam-ajay 🐙 github.com/ankam-ajay

Education

International Institute of Information Technology <i>Master of Science in Data Science (CGPA: 9.0/10)</i>	07/2024 - 03/2026 Hyderabad
Methodist College Of Engineering and Technology <i>Civil Engineering (CGPA: 8.2/10)</i>	07/2019 - 08/2022 Hyderabad
Govt. Polytechnic Masabtank <i>Civil Engineering (CGPA: 94%)</i>	06/2016 - 08/2019 Hyderabad
Trinity High School <i>SSC (GPA: 9.0/10)</i>	2016 Mancherial

Skills

Programming: JavaScript, Python, Golang (Basic), SQL
Backend: Node.js, Express.js, FastAPI
Frontend: React.js, Next.js, Tailwind CSS
Databases: MongoDB, SQLite, Elasticsearch (Basic)
Tools: Git, GitHub, Postman, Docker (Basics), Google App Engine
Concepts: REST APIs, System Design (Basics), Scalable Systems, DBMS, Data Structures and Algorithms
Soft Skills: Analytical Thinking, Problem Solving, Clear Communication

Projects

Task Management Dashboard (Full Stack Application) [Live Demo](#)

Tech: React, Node.js, Express.js, MongoDB, Google App Engine

- Developed a scalable full-stack task management system with role-based access control (Admin/User)
- Designed and implemented RESTful APIs using Node.js and Express.js with modular architecture
- Integrated MongoDB for efficient data storage and optimized query performance
- Implemented secure authentication using hashed passwords and environment-based configuration
- Deployed the application on Google App Engine, ensuring scalability and high availability

Fitness Tracker Web Application (MERN Stack) [Live Demo](#)

Tech: MongoDB, Express.js, React.js, Node.js, JWT, Material UI

- Built a full-stack MERN application to track workouts, calories, and user activity
- Implemented secure user authentication using hashed passwords and JWT-based authorization
- Designed RESTful APIs with proper routing, validation, and error handling
- Structured MongoDB schemas and aggregation pipelines for efficient analytics
- Developed a responsive UI to visualize fitness trends and user-specific insights

Internship

Full Stack Developer Intern – Center for Visual Information Technology (CVIT), IIIT Hyderabad 2026 – Present

Guided by Prof. C. V. Jawahar – [Project GitHub Repository](#)

- * Designed high-performance REST APIs using FastAPI with asynchronous processing for parallel OCR requests
- * Built scalable backend architecture for multi-model OCR evaluation and annotation workflows
- * Optimized backend performance using asyncio to efficiently handle concurrent API requests
- * Developed responsive UI for document comparison, annotation, and real-time visualization
- * Implemented text-to-bounding-box mapping for accurate OCR data processing

Certifications

- * **SQL Course** – Cuvette Tech Pvt. Ltd. (IIT Kharagpur Alumni Initiative) – 2025
- * **AI & ML Technical Workshop** – Remark Skill Education & Infinium, IIIT Hyderabad – 2025
